EDUCATION

Degree/Certificate	Institute/Board	CGPA/Percentage	Year
B.Tech. (CSE Robotics and AI)	Lovely Professional University	8.92	Present
Senior Secondary	MPBSE	87%	2024
Secondary	MPBSE	86%	2022

INTERNSHIP

Research Intern – Centre for Artificial Intelligence and Robotics (CAIR), IIT Mandi Aug 2026 – Dec 2026

- Selected for the Research Internship Programme at CAIR, IIT Mandi, under the supervision of Dr. Jagadeesh Kadiyam, mentored by Lakshyajit Behera.
- Joining Date: 17.08.2026 Duration: 4 months.

TECHNICAL SKILLS

- Languages:** Python, C++, C, JavaScript
- Frontend:** HTML, CSS, JavaScript, React JS
- Database:** PostgreSQL, MongoDB
- Tools:** Git/GitHub, MATLAB, Arduino, ESP32, Raspberry Pi
- Core CS:** Data Structures & Algorithms (C++), Machine Learning, Embedded Systems, OpenCV, numpy, pandas, Matplotlib
- Currently Learning:** Data Structures and Algorithms (DSA) in C++, Machine Learning, Deep Learning

ACHIEVEMENTS

- 2nd Position** Human Device Interface Track, SemiXthon'26 (DTU). 2026
- Rank 4** Out of 10 finalists, LPU – GCI Competition at Matsuo Laboratory, University of Tokyo. 2025
- Rank 285** Worldwide – GCI Competition at Matsuo Laboratory, University of Tokyo. 2025
- Scholar** National Means-cum-Merit Scholarship (NMMSS). 2021

WORKSHOPS, SEMINARS AND CERTIFICATIONS

- Participant** MEDHA 2.0, IIT Bombay. 2026
- Certified** Oracle Fusion AI Agent Studio Certified Foundations Associate – Rel 1. 2026
- Appreciation Certificate** North India Biggest Hardware Edition @ DTU. 2025
- AI Upskilling Certificate** Technical Foundations, Qualcomm Academy. 2025
- Participant** Global Consumer Intelligence Course 2025, University of Tokyo. 2025

PROJECTS

Business Proposal: Leveraging HR Analytics to Reduce Employee Attrition 2025

(GCI Final Assignment, Matsuo Laboratory, University of Tokyo)

- Created a business proposal based on a given dataset; identified employee attrition as the client's key business problem through data and market analysis.
- Conducted market analysis, exploratory data analysis (EDA), built and evaluated machine learning models, and presented actionable recommendations.

Home Credit Default Risk

2025

(GCI Competition Project, Matsuo Laboratory, University of Tokyo)

- Developed a machine learning model to predict loan default probability using multidimensional customer data, estimating the likelihood of default for individual customers.

Smart AI Classroom Microphone (EduMic)

2025

- Developed an ESP32-based smart classroom assistant that converts teacher speech into real-time text, lecture summaries, key formulas, and AI-generated MCQs using speech recognition and NLP.

- Integrated the system with a web platform for cloud-based lecture storage and student access, with noise filtering to reduce background interference.

MediVue – Smart Health Monitoring System for Elderly Care

(IoT-Based Healthcare Monitoring Project)

- Designed and developed an IoT-based healthcare monitoring system to improve safety and continuous monitoring for elderly individuals living independently.
- Integrated real-time vital sign monitoring including heart rate, SpO₂, body temperature, and fall detection for emergency response.
- Implemented automated alert mechanisms with instant notifications and caregiver communication for critical health events.
- Built a smart monitoring framework combining sensor integration, embedded programming, and intelligent automation.
